HERE ARE SOME HELPFUL TIPS FOR A SMOOTHER EXPERIENCE

COMPUTER

Using a **personal computer** ensures better compatibility for creating your yearbook ad. Avoid using **WORK** computers.

Many workplace networks have firewalls, antivirus software, or pop-up blockers that can interfere with our website's features.

DEVICES

Avoid using phones or tablets, as they may cause issues during the process.

Our yearbook ad site works best on a personal computer. Mobile browsers often don't support all the tools needed to create and preview your ad.

SETTINGS

Turn off your pop-up blockers to access all features without interruptions.

If you're having trouble seeing preview windows or saving your ad, make sure your pop-up blocker is turned off.
